

High School Course Planner for _____ Grade

Instructions

The table below will make planning your high school courses easier and better organized.

- Print a copy of the table for each year of high school.
- Fill in the courses you must take for graduation at the high school you will attend.
- Use the remaining space to fill in the courses recommended for a student planning your career.

If you need help determining requirements or finding out what courses are available to you during high school, speak to a counselor.

Once you have completed your four-year course planner, ask a parent or counselor to review it to make sure you included every course you need to graduate and to meet your goals.

	Fall Semester	Credits	Spring Semester	Credits
