South Arkansas Community College will offer a wide range of opportunities for students to successfully pursue training and education from pre-college studies through baccalaureate and graduate programs, including opportunities for continuing education and other professional development.

Accordingly:

1. **Performance after transfer**
   The College will monitor the performance of transfer students with a goal of achieving the next level for degree completion.

2. **Seamless transition**
   The College will establish and maintain articulation agreements with higher education institutions where a significant number of our students transfer, and keep those agreements current.

3. **Progression**
   The College will attempt to increase the rate of persistence from fall to spring as defined by continued enrollment.

Monitoring Report due: September (Internal Report)
