COMMENTS AND NOTES:

Program Description	This program is for certified EMT's to obtain further training at an intermediate level between EMT and Paramedic. The program is designed to prepare students for the AEMT licensure examination. The primary focus of the AEMT is to provide basic and limited advanced emergency medical care and transportation for critical and emergent patients and the use of basic and advanced equipment typically found on an ambulance. Almost all of the AEMT program courses are Paramedic program courses. Therefore, the AEMT graduate who is accepted into the Paramedic program will have a majority of the courses already completed, thereby creating an easier path to becoming a paramedic. Successful graduates of the AEMT program earn a Certificate of Proficiency (CP) from the college and qualify to take the national registry AEMT test.
Program Requirements	Total program credit hours = 15. An application to the program is required. Applicants must be a current nationally-registered Emergency Medical Technician (EMT). Students must successfully complete program requirements with a grade of "C" or higher. See webpage for further information. Applicants must pass a criminal background check and drug screen upon entry to the program (instructions will be provided by the program director).
