COMMENTS AND NOTES:

Program Description	EMSPs are health professionals concerned primarily with pre-hospital care of acutely ill and injured patients. EMSPs perform such measures as CPR, extrication of patients from constraining environments, initial patient assessment, stabilization, and emergency and routine transport to healthcare facilities. Paramedics play an expanded role in administering emergency care using invasive techniques through standing orders, and they may assist in various basic settings, such as the Emergency Room (ER) or Intensive Care Unit. The EMT-to-Paramedic program consists of three semesters of concentrated study including classroom, hospital clinical experiences, and field internship rotations with an Advanced Life Support ambulance service. Also see the EMT-to-Paramedic AAS GPS and required curriculum.
Program Requirements	Total Program Credit Hours = 60: An application to the program is required. A minimum of 1200 contact hours is required for course completion to include: 1) 600 classroom and laboratory hours, 2) 300 hospital clinical hours, and 3) 300 hours of ALS ambulance field internship. Successful graduates of the core EMT-to-Paramedic program earn a Technical Certificate (TC). Students entering the paramedic program must first be licensed as an EMT and be at least 18 years of age upon completion of the program to take the registry exam to become a licensed paramedic. Students must successfully complete program requirements with a grade of 'C' or higher. See webpage for further information.
