

***This is a SouthArk Master Syllabus. The course syllabus distributed by the instructor may include additional requirements, must be followed by the student in the given term, and is considered to supersede the Master Syllabus.***

**Course Number**

MATH 2115

**Course Title**

Calculus II

**Course Description**

A continuation of Calculus I. Topics include differentiation and integration of inverse trig and hyperbolic functions, applications of definite integrals, integration techniques, l'Hopital's Rule, improper integrals, and infinite series.

**College Mission**

South Arkansas Community College promotes excellence in learning, teaching, and service; provides lifelong educational opportunities; and serves as a cultural, intellectual, and economic resource for the community.

**College Wide Student Learner Outcomes**

Critical Thinking

Responsibility

Communication

**ACTS Course**

**Program Course**

**ACTS Outcomes**

1. The student will understand and apply the following integration techniques: Integration by parts, Trigonometric and substitutions, integration of rational functions using partial fractions, and improper integrals.
2. The student will perform applications by integration.
3. The student will understand and apply sequences and infinite series, including convergence tests, Taylor series, and radius of convergence.

**Program Outcomes**

**Course Outcomes**

CLO #	Course Outcomes	Unit Outcomes/ Competencies	ACTS	Program	Critical Thinking	Communication	Responsibility	Assessment
CLO 1	Perform applications of definite integrals.	I.1-2	2		CT2			Questions embedded in the Final Exam.
CLO 2	Apply techniques of integration including using integration by parts, trigonometric and substitutions, integration of rational functions using partial fractions, and improper integrals.	III.1-2	1					Questions embedded in the Final Exam.
CLO 3	Solve problems using sequences and infinite series, including convergence tests, Taylor series and radius of convergence..	V.1-2,4-5	3					Questions embedded in the Final Exam.

**Unit Outcomes/ Competencies**

- I. Applications of Definite Integrals.  
The student should be able to:
  1. Find volumes of revolution and volumes with known cross-sections by using definite integrals.
  2. Calculate arc lengths and surface areas by using definite integrals.
  
- II. Transcendental Functions.  
The student should be able to:
  1. Find limits using L'Hopital's rule.
  2. Apply differentiation and integration to inverse trigonometric functions.
  3. Apply differentiation and integration to hyperbolic functions.

### III. Techniques of integration.

The student should be able to:

1. Find indefinite integrals using basic integration formulas, integration by parts, trigonometric integrals, trigonometric substitutions, partial fractions, integral tables, and improper integrals.
2. Apply some of these integration techniques to solve problems.

### IV. First-Order Differential Equations.

The student should be able to:

1. Use initial conditions to find particular solutions of differential equations.
2. Use Euler's method to approximate solutions of differential equations.
3. Use exponential functions to model growth and decay in applied problems.
4. Use differential equations to model and solve applied problems.
5. Solve first-order linear differential equations.

### V. Infinite Sequences and Series.

The student should be able to:

1. Determine the convergence or divergence of a given sequence.
2. Determine if a given series is divergent or convergent using the tests for convergence.
3. Find polynomial approximations of some elementary functions.
4. Determine the radius of convergence for a given power series.
5. Determine Taylor series for some elementary functions.

### VI. Conic Sections, Parametric Equations, and Polar Coordinates.

The student should be able to:

1. Graph curves using parametric equations and apply parametric equations.
2. Apply the calculus operations to parametric equations in order to solve problems of arc length and surface area.
3. Graph curves using polar coordinates.
4. Use polar coordinates to solve area and arc length problems.
5. Analyze and apply conic sections using their algebraic equations and their polar equations.

### Assessment Description(s)

Each course completer will take a departmental final exam. For each of the Learner Outcomes, the instructor(s) will select two questions from the exam that they determine best measures that outcome. Proficiency for each outcome will be defined as the student correctly solving at least one of those two problems. The goal is that for each outcome, 70% of the course completers will demonstrate proficiency.

### Materials and Technological Requirements

Calculus, Single Variable, 13<sup>th</sup> edition by Thomas, Weir, and Haas along with the access code for MyMathLab. TI- 84 plus graphing calculator.

### Class Attendance Policy

Students are expected to attend all classes in which they are enrolled. If a student is absent from a class session, it is the student's responsibility to make arrangements to complete or make up any work missed. No make-up work for missed classes will be allowed without the approval of the instructor. Students who enroll late must assume all responsibility for work missed. Classes not attended as a result of late enrollment may be counted toward excessive absences. Students not attending the entire class period may be counted absent for that period. An instructor may drop students with a grade of "WE" if students have been absent for an excessive number of days. Warning letters will be sent to the students advising them of the consequences of nonattendance and urging them to contact their instructors immediately. Excessive absences are defined as follows:

### Regular Semester

Courses which meet once a week .....	2 absences
Courses that meet twice per week .....	3 absences
Courses that meet four times per week .....	5 absences

### Summer Session

Courses that meet four times per week in a five week session .....	3 absences
Courses which meet two evenings per week in a 10 week session .....	3 absences

Students enrolled in special programs or individualized instruction should contact their program director/instructor regarding specific attendance requirements for the program/course. Some of the selective-admission, health-science programs have specific criteria regarding attendance. Students are encouraged to refer to program policies in these matters.

#### Jury Duty/Military/Official School Function

Scheduled absences are those that occur due to college-related activities or as a result of summons to jury duty or military duty. Classes missed as a result of scheduled absences will not be counted as excessive absences if the instructor is notified and provided documentation prior to the absence(s). Make-up work for scheduled absences will be at the discretion of the instructor.

In all instances, documentation must be provided to the instructor within 24 hours of receipt. Documentation should come from an appropriate party on letterhead or other official stationery with a signature and contact information. Documentation should list the corresponding dates of the leave.

#### Medical leave

For medical-related absences, documentation must include written notice from the treating medical professional documenting time needed off related to medical reasons and time student may resume classes. The medical reason does not need to be listed on the documentation; the documentation must include only that there is a medical reason, the amount of time the student needs to be absent, and the time the student should be able to return to classes. Students who elect to work at home while on excused leave must meet with their instructors to make arrangements to do so. Working on coursework while on medical leave is not a requirement but can be requested by students. If students request that they be allowed to work at home while on an excused leave, the instructor will make every reasonable effort to ensure that the student is able to do so.

For students who have a medical condition necessitating time off or accommodation:

- 1) They may work at home on assignments if they choose to if on medical leave approved by a medical professional
- 2) Receive appropriate accommodations related to coursework (i.e., excused from labs with potentially harmful chemicals, have a larger desk, etc.)
- 3) Resume their studies where they left off once they return to classes
- 4) Be allowed to make up any missed work related to medical leave
- 5) Receive incompletes on their transcripts until coursework is completed, according to the incomplete grade contract.
- 6) Be given a reasonable time frame in which to complete missed coursework

#### **Academic Honesty Policy**

Students enrolled at South Arkansas Community College are expected at all times to uphold standards of integrity. Students are expected to perform honestly and to work in every way possible to eliminate academic dishonesty. Academic dishonesty includes cheating and plagiarism, which are defined as follows:

- Cheating is an attempt to deceive the instructor in his/her effort to evaluate fairly an academic exercise. Cheating includes copying another student's homework, class work, or required project (in whole or in part) and/or presenting another's work as the student's own. Cheating also includes giving, receiving, offering, and/or soliciting information on a quiz, test, or examination.
- Plagiarism is the copying of any published work such as books, magazines, audiovisual programs, electronic media, and films or copying the theme or manuscript of another student. It is plagiarism when one uses direct quotations without proper credit or when one uses the ideas of another without giving proper credit. When three or more consecutive words are borrowed, the borrowing should be recognized by the use of quotation marks and proper parenthetical and bibliographic notations.

If, upon investigation, the instructor determines that the student is guilty of cheating or plagiarism, the following penalties will apply:

- The student will receive a penalty of no less than a zero on the work in question.
- The instructor will submit a Student Academic Misconduct Form, written report of the incident, to the appropriate dean.
- The dean will submit form to Vice President for Learning to determine disciplinary action.
- The Vice President for Learning will determine whether further disciplinary action will be taken.
- All decisions may be appealed for review through the college's academic appeals procedure.

**Equal Opportunity-Affirmative Action Statement**

South Arkansas Community College does not discriminate on the basis of age, race, color, creed, gender, religion, marital status, veteran's status, national origin, disability, or sexual orientation in making decisions regarding employment, student admission, or other functions, operations, or activities.

**Library Services**

Library Homepage: <http://southark.libguides.com/homepage> Library Contact: LibraryStaff@southark.edu or 870.864.7115

**Procedures to Accommodate Students with Disabilities:**

If you need reasonable accommodations because of a disability, please report this to the Vice President of Student Services with proper documentation. . VPSS Contact: 870.875.7262

**The Early Alert System**

In an effort to ensure student retention and success, South Arkansas Community College employs an Early Alert System to identify and support at-risk students as soon as possible in a given semester. The intent of Early Alert is to provide this assistance while there is still time to address behaviors or issues that have the potential of preventing students from completing their courses and degree plans. Students referred through the Early Alert System will be required to work on a corrective action plan with their student advising coach and to include attendance accountability and mandatory academic tutoring either in the academic division or in the Testing and Learning Center (TLC).

Once the Student Advising Coach has met with the referred student, and again when the student has met the prescribed corrective actions, the coach will update the Early Alert System so that the instructor is kept informed of the progress in resolving issues.

**Behavioral Review Team**

At South Arkansas Community College (SouthArk), we are committed to proactive leadership in student wellbeing and campus safety. By focusing on prevention and early intervention with campus situations that involve any person experiencing distress or engaging in harmful or disruptive behaviors, the BRT will serve as the coordinating hub of existing resources to develop intervention and support strategies and offer case management. Students, faculty, staff, and campus guests are encouraged to report any person on campus who is a concern. BRT Contact: 870.875.7262 BRT@southark.edu

**Date of Revision: 8/31/2016**
